Shane Turner, DBA

Defense Growth & Strategy Executive | Land Systems | Live Training & LVC | Integrated Fires

928-210-9921 | linkedin.com/in/drshaneturner | resume.st-dba.com | Active Top Secret clearance | U.S. Marine Corps veteran

EXECUTIVE PROFILE

Defense growth and strategy executive with 20+ years across Army, Navy, Air Force and Marine Corps programs. Sets division growth strategy, prioritizes markets and builds the capture campaigns behind $1B+ in Navy range contract wins and the U.S. Army's $379M LTRaC live training IDIQ. Knows land systems from the hardware up: live-fire test of the XM1203 NLOS-C automated 155mm cannon at Yuma Proving Ground, then more than a decade modernizing range equipment and infrastructure and fielding land-based threat systems from experimental prototypes to programs of record, including threat radars, emitters, SA-6 and SA-8 SAM systems and MANPADS. Directed a 700-person, $896M Navy range contract. Now leads Astrion's enterprise AI initiative and the data, evidence and AI strategy for its Layered Defense, Autonomous Warfare and Integrated Fires division.

CORE CAPABILITIES

Strategy and growth: Division growth strategy | Market, customer and competitive analysis | Market and portfolio prioritization | Capture and campaign planning | Solution architecture | Technical volumes and win themes

Land and mission systems: Land combat and fires systems | Live training, ranges and LVC | Range modernization | Threat radars and emitters | Foreign threat systems (SA-6, SA-8, MANPADS) | EW and C-UAS | Directed energy | Multi-domain T&E

Leadership and execution: Cleared cross-functional teams | Executive program leadership | Cost, risk and EVMS | FAR/DFARS | Enterprise AI strategy and ModelOps | Data governance and evidence

PROFESSIONAL EXPERIENCE

Astrion

Remote | 2024 – Present

Senior Vice President, Solutions & Artificial Intelligence **Jun 2026 – Present**

Layered Defense, Autonomous Warfare & Integrated Fires Division. Promoted from Vice President.

- Lead Astrion's enterprise AI initiative company-wide. Stood it up from nothing, launching shAIne, the enterprise AI platform, with governance in place from the first month. Reached full seat uptake within one quarter at about 77% weekly use. Measured savings from the first three users cleared the platform's full annual cost by 40%.
- Set the technical approach for data, evidence, analytics, ModelOps and scenario development across the detect, identify, track and defeat chain for Counter-UAS, integrated fires and autonomous systems, supporting all six Astrion mission areas.
- Turn test, training and operational data into decision-grade evidence, solution narratives and capability development plans for high-value pursuits.

Vice President, Multi-Domain Test & Evaluation **Oct 2024 – May 2026**

- Owned division growth strategy for multi-domain T&E across air, land, sea, space and cyber: set market priorities, capability narratives and capture focus areas, with direct responsibility for expanding revenue.
- Led solution architecture and capture strategy for strategic pursuits. Authored technical volumes, built win themes and ran competitive analysis to position Astrion against incumbents.
- Authored a 20-page white paper that combined Astrion's Counter-UAS, small UAS and EW capabilities (Digital Horizon, Meridian, PULSE, Facet) into one U.S. Army market offering.
- Redesigned CrewFlex from a legacy scheduling tool into an automated enterprise asset rated a proposal Strength by government evaluators.
- Received the 2025 ASTRYS Award for Strategic Excellence in Innovative Solutions, Astrion's highest company honor.

Director, Program Management **Aug 2024 – Oct 2024**

- Turned capture wins into executable portfolios with schedule and cost governance. Promoted to Vice President in two months.

HII Mission Technologies Virginia Beach, VA | 2020 – 2024

Program Manager, EWTPS System Modernization **Jan 2024 – Aug 2024**

- Owned modernization of the Navy's Electronic Warfare Threat Presentation Systems (EW, communications, RF/microwave and mobile range systems), proposal through execution, across CONUS and OCONUS ranges. Delivered on budget and on schedule, with outstanding QASP scores and top transition scorecard marks.

Live & Virtual Range Solutions SME (concurrent) **Jan 2023 – Aug 2024**

- Authored the winning technical proposal for the U.S. Army's $379M Live Training, Ranges, and Combat Training Centers (LTRaC) IDIQ.
- Architected the Navy live and virtual training range solutions behind $1B+ in contract wins across the NCTE, NITE and CTTR pursuits. Wrote winning RFP and FEDSIM responses for Army, Air Force, Navy and Marine Corps teams.

Lead Engineer, Directed Energy Systems Integration Lab (concurrent) **Oct 2022 – Aug 2024**

- Stood up the Navy's Directed Energy Systems Integration Lab (operations center and data systems) at Point Mugu and Port Hueneme, enabling the first directed energy weapon tests on the Pacific range complex.

Associate Principal Project Engineer, Navy Continuous Training Environment **Sep 2021 – Jan 2023**

- Built a dispersed engineering workforce from scratch that delivered 35 projects ahead of schedule and under budget. Cut project overhead 18% and improved West Coast range portfolio efficiency 22% year over year across six range sites.

Program Manager / West Coast Director, Navy Integrated Training Environment **Sep 2020 – Sep 2021**

- Directed 700+ personnel executing an $896M Navy contract across the western United States. Integrated North Island and San Clemente Island into the contract, expanding SoCal Range capability while reducing operating costs.

Navy and Marine Corps Range Engineering and Operations Yuma, AZ | 2010 – 2020

Amentum (2020) | URS, an AECOM company (2014 – 2020) | Northrop Grumman (2011 – 2014) | Aerotek (2010 – 2011)

Operations Manager / Contract Site Manager, Combined Tactical Training Ranges **2015 – 2020**

- Ran Southwest Region range operations at MCAS Yuma, MCAS Miramar and NAF El Centro, leading 123 staff across IT/cyber, quality, safety, security, logistics and operations.
- Negotiated a 35-acre lease for an EW complex, consolidating operations for 50+ personnel.
- Held a three-year zero-incident safety record (90,773+ hours), the longest in program history.

Engineering Manager **2010 – 2015**

- Managed 115+ engineering projects ($100K to $1M each) across threat systems, radar, EW, RF/microwave, TSPI and data tracking, telemetry, communications and range IT.
- Modernized land range equipment and infrastructure, including threat system sites, communication towers, LAN/WAN networks and supporting construction. Wrote the SOWs, RFPs, RFQs and bills of material behind them.
- Integrated, fielded and sustained a wide range of land-based threat and range systems for Navy and Marine Corps training, from experimental prototypes to programs of record, including threat radars and emitter simulators, SA-6 and SA-8 surface-to-air missile systems and MANPADS threat representations.

Early Career Yuma, AZ | 2007 – 2010

SIPRNet Administrator, Epsilon, Inc., MCAS Yuma (2009 – 2010). Managed classified devices and networks and configured systems for cybersecurity compliance.

Engineering Technician, BAE Systems, U.S. Army Yuma Proving Ground (2007 – 2009). Supported build-up, integration and live-fire testing of the XM1203 Non-Line-of-Sight Cannon (NLOS-C) prototypes, the Future Combat Systems 155mm self-propelled howitzer with automated ammunition handling.

EDUCATION, SERVICE AND AFFILIATIONS

Doctor of Business Administration (DBA), Management, with Distinction | National University | 2024

M.S., Management Information Security | Lewis University | 2015

B.S., Software Engineering | University of Phoenix | 2009

United States Marine Corps | 1991 – 1997
